

SCREW ENGINE ELECTRONIC PRESS KIT

Screw engine

A VST3/AU plugin that slows, chops, and warps audio in the authentic chopped-and-screwed style born in Texas.

ABOUT THE PLUGIN

Screw Engine

Screw Engine is a professional audio plugin that brings the iconic chopped-and-screwed sound of Texas into your DAW. Inspired by the pioneering techniques of the screw scene, it delivers pitch-shifting, flanging, phasing, tape emulation, and beat-repeating effects — all tuned for authenticity and musical expression.

Designed for producers and artists, it's built for master bus processing and offline rendering. **Every parameter is fully automatable** — set your min/max ranges, enable auto-modulation, and export. The plugin handles the rest with randomized, beat-synced movement that makes every render unique. No manual tweaking required.

Built In Texas by **Wrecks Audio**.

TECHNICAL SPECS

Format	VST3 / AU
Platforms	Windows / macOS
Version	1.0.1
License	Key-based Activation
GUI Skins	4 Included
DAW Sync	Tempo & Transport
Automation	All Parameters + Built-in Auto-Mod
Developer	Wrecks Audio

CORE EFFECTS

What It Does

Six effects working together to create the definitive chopped-and-screwed processing chain.

Screw — Pitch Down

Continuously pitch audio down up to 12 semitones. The classic slowed, screwed sound that defines the genre.

Drank — Flanger

Swirling modulation that adds depth and movement. Auto Drank mode drifts the effect on beat-synced intervals.

Smoke — Phaser

Sweeping, spacey phaser with configurable depth. Auto Smoke delivers randomized, smooth parameter movement.

Tape — Flutter

Simulates tape wobble and pitch drift like a worn cassette deck. Auto Tape adds organic imperfections over time.

Chop — Beat Repeat

Chops forward on press and chops back right on beat. Auto Chop randomly triggers repeats synced to downbeats or snares.

Mix — Wet/Dry

Blend between the original and processed signal from 0% to 100%. Run on the Master track at 100% for best results.

INTERFACE

Four Skins Included

Each skin ships with the plugin. Switch freely to match your workflow or vibe.

OG PURPLE

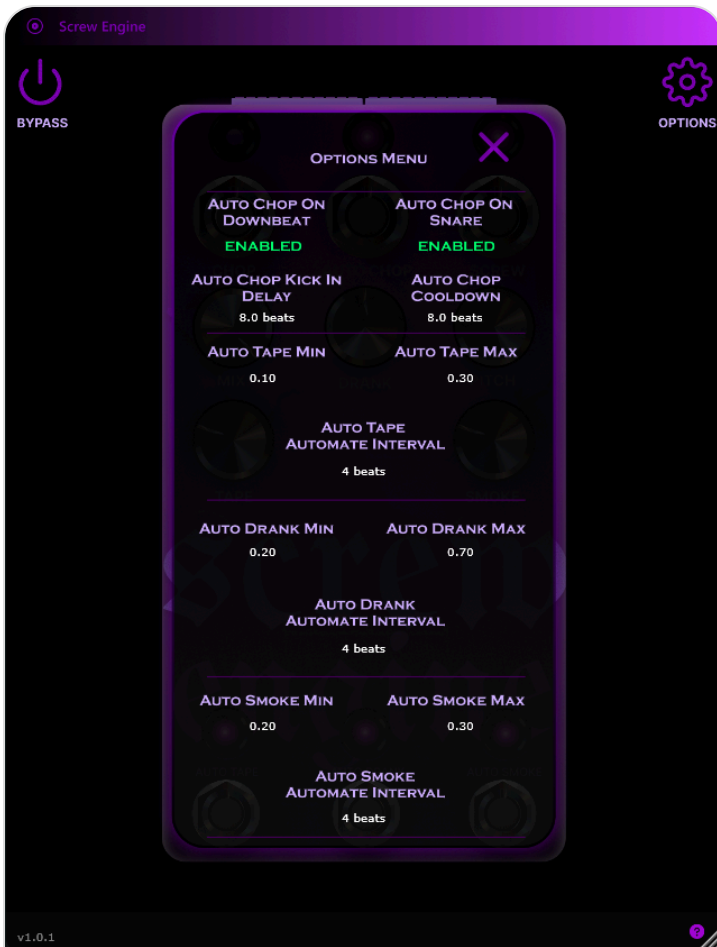

MIDNIGHT BLUE

SWAMP GREEN

SMOKE GREY

OPTIONS & AUTO-MODULATION SETTINGS

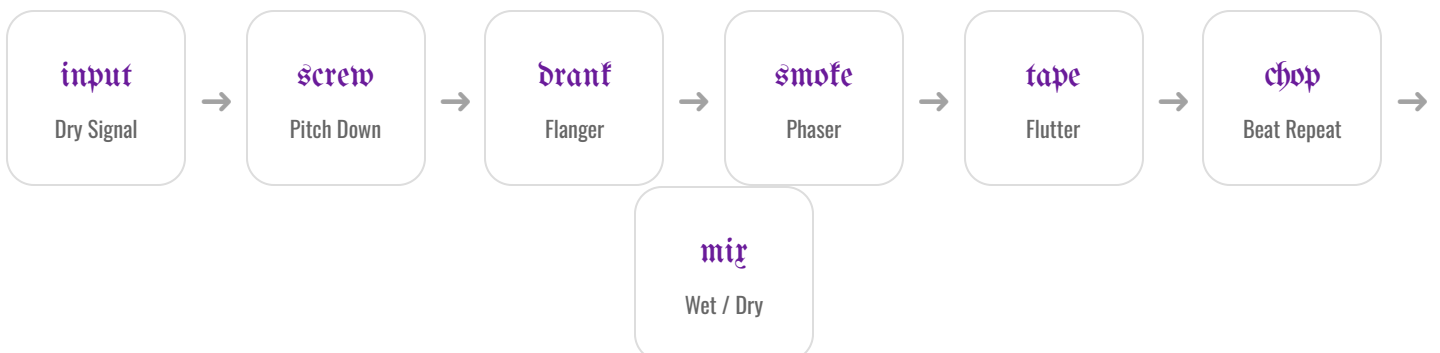

BYPASS MODE WITH VISUAL OVERLAY

PROCESSING ORDER

Signal Chain

Effects are processed in a fixed, musical order designed for optimal chopped-and-screwed sound.
